Gold for OffTEC Training and Development Cluster: Website relaunch receives TYPO3 award

Monday, 4 December 2018

Jubilation throughout the whole of Germany – from the North Sea to Bavaria. “This is simply fantastic”, says a delighted Klaus Loesmann, commercial director at OffTEC, Europe’s leading wind industry training centre. The Enge-Sande based enterprise won the international gold award for the best website of the year 2017-2018 in the Small and Medium Business (SMB) category. Loesmann celebrated this milestone of corporate communication today with the agencies Wiechmann Voss GmbH of Hamburg, and Visionbites GmbH of Munich, who developed the concept, copy and design and implemented the programming.

Gold for OffTEC - Respect the Elements

The awards have been given by the TYPO3 Association since 2015 for especially “creative and user-friendly websites”. At Berlin’s Admiralty Palace, the Who’s Who of the international TYPO3 community celebrated the best projects realised with the free content management system TYPO3 CMS. The newly developed OffTEC website *Respect the Elements* reflects the company’s image as a highly qualified, technically excellent provider of safety training through its catchy design and technical sophistication. The website’s comprehensive course module enables OffTEC’s existing and prospective customers to research, reserve and book all the safety and technology training courses for the most varied requirements.

OffTEC, based in the North Frisian town of Enge-Sande, is Europe’s most unique training centre providing realistic safety and rescue courses and technical qualifications for the wind and maritime sectors. Situated 150 km north of Hamburg, OffTEC offers courses in all four elements, fire, water, air and earth, at all levels of difficulty and in one location.

About OffTEC

The Offshore Training and Development Cluster (OffTEC) has been offering comprehensive qualification under virtually realistic conditions for wind and maritime industry personnel since 2011 – all at one location. Europe's biggest training and advanced training centre in the North Frisian town of Enge-Sande holds all the relevant safety and technology training courses with focus on safety and rescue on land and at sea.

OffTEC boasts a state of the art maritime training centre, fire prevention and technology training centres, a wind park for training safety at height and rescue from height and has its own guesthouse for 36 persons. The company is thus the first in the sector to offer a real full service. The range of courses includes a wide variety of training opportunities in accordance with established domestic and international standards, tailored to the clients' individual requirements. OffTEC is a certified provider of all Global Wind Organisation (GWO) standard safety-training courses.

About Wiechmann Voss and Visionbites

In association with the Munich based Internet agency Visionbites, the Hamburg PR and marketing agency Wiechmann Voss creates technically sophisticated web solutions for industry and the renewable energy sector. In collaboration with Visionbites, Wiechmann Voss, responsible for concept, copy and design, implementation and content, develops digital projects in frameworks such as Laravel, TYPO3 and Kirby, or from scratch with PHP, MySQL and JavaScript. Centre stage for the agency partners is always a perfectly coordinated digital solution for the client, based on their respective marketing strategy.

Publication and reprinting free of charge; we request that a specimen be sent to OffTEC Base GmbH & Co. KG.

Please request or latest corporate magazine, which contains plenty of details and background information about the company.
