

Wind Escapettor - Single Person Evacuation Device

Product and user training in the safe use of the rescue device

The trend to ever-greater hub heights means the use of one-person evacuation devices has become more important than ever. Participants in such a user training course learn safe and confident handling of the rescue device and evacuation procedures using it.

Teaching Content

Theory

- Instruction in self-securing functions and self-braking

Practice

- Single-handed and two-handed descent
- Practising self-braking during abseiling
- Rescuing a second person

Duration

- Basic instruction
evacuation, self-rescue and ladder rescue
1 day, 8 lessons
- Brief training session
evacuation
0,5 days, 4 lessons

Prerequisites

A minimum of physical fitness is expected.

Number of Participants

4 to 12 person

Certificate and Validity

A certificate will be issued on successful completion of the course and an appropriate entry will be made in the participant's safety pass.

The validity of the certificate is unlimited.

Notes

The course is available in German and English. Thanks to its partnership with Protection, OffTEC is now in the position to offer its customers a high-quality one-person evacuation device that can be tested in rescue from height scenarios and then obtained directly through OffTEC.
